Maybe even better than free.

You can upload any type of file (movies, music, documents, images, zip files and more). Files can be downloaded from any computer from our high speed servers. You don't need any special software installed to be able to download your files. File is free to use with no gotchas and no hidden fees. There are no restrictions on the number of times a file can be downloaded. Keep your files private, or send your download links only to friends or family. Just upload the file you want to share with your friends and we send you a download link to your file. Files transferred the old-fashioned way tend to pile up and be forgottenabout, eventually costing you money in data storage fees. We have no file size limit. This is easy, fast and reliable filehosting! You don't need any kind ofpremium-accounts. Any file in any format can be uploaded and downloaded for free. Simply upload your file and share the link. Alternatively you can chooseto share your download links on blogs, forums and social networking sites. Unfortunately, we can't make that part free. No account or credit card is required toget started. It is also allowed to link to the download page from websites and communities. Why pay storage fees for a file that you just wanted to send to afriend or colleague? Also, many team chat apps have limits to the size of files that can be transferred within their apps. If only we could, we surely would! Onthe other hand, using file can actually save you money. Our service is completely free for everyone. The cost of that data transfer is covered by your internetservice or the data plan on your phone. filehosting provides an easy possibility for you to send large files to your friends. So try our free and simple filehostingservice now. Using file, you can circumvent those limits without paying to upgrade your team chat service. You can give this download link to your friends bymail or instant messenger. Your wallet will be none-the-lighter! Just so we're all 100% clear here: When you share a file, data is being transferred between yourcomputer or phone and our servers, then from our servers to your friends device. You decide who you want to share your files with. When you use file, youavoid storing the file you're sending in your cloud storage or mail server.
